

New Feature Events

All known Air Events
will be uploaded at
this stage

EasyCockpit - Apple / iOS

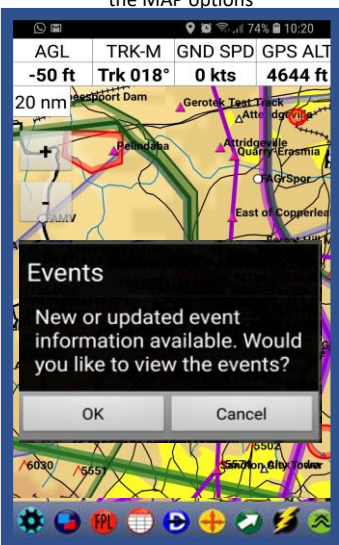

Step 1

On opening EasyCockpit, the Event Pop Up will appear each time there is an update, after your last view.

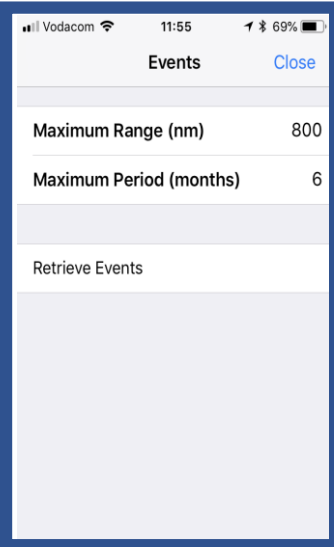

Select OK to retrieve Event Information

OR Cancel to disregard this option.

Note : You will be able to retrieve Event Information at a later stage should you choose not to retrieve this immediately. Simply tap on Events in the MAP options

EasyCockpit - Android

Step 2

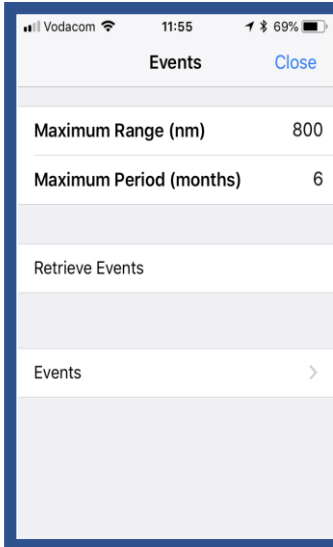

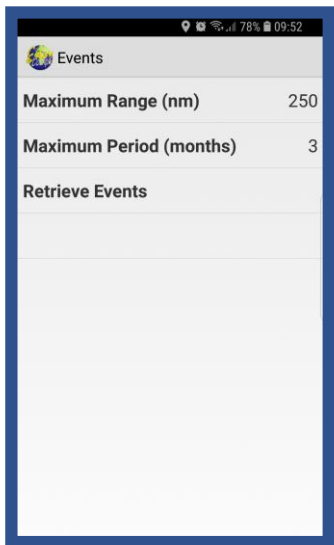

You may edit your parameters for retrieving information.

Set the desired distance and time period you would like to view.

Default parameters are

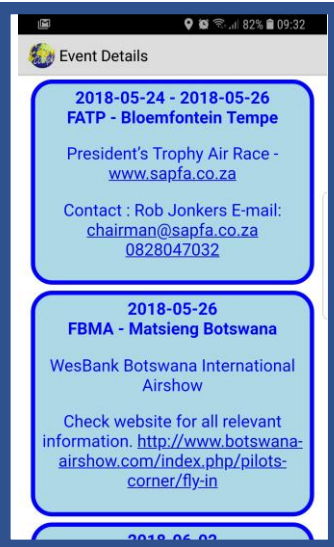

Range : 250nm

Period : 3 months

Step 3

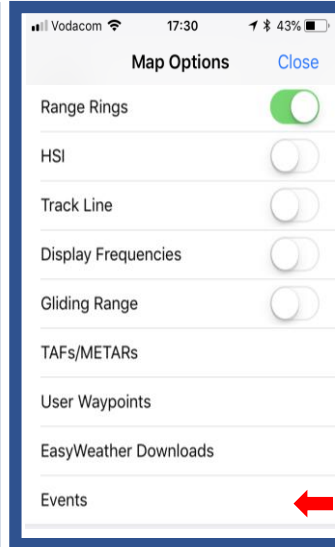

Added step for iOS :
Tap on Events

Step 4

Event Information will be retrieved and displayed by date.

Scroll down to view more events as per your set parameters, eg 3 months or 6 months, etc

OR Alternative Step 1

ACCESS EVENT INFORMATION LATER

You can access Event information at any time.

Select MAP Options and tap on Events

Proceed to Step 2
